

**WE CLAIM:**

1. A children's toy for making confections of preselected designs, comprising:  
a base platform having an alignment member; and  
5 a confection mold tray including an alignment structure configured to engage  
the alignment member of the base platform.

2. The children's toy of claim 1, including a plurality of confection mold trays.

3. The children's toy of claim 2, wherein the confection mold trays are  
configured for vertical stacking one on top of another.

4. The children's toy of claim 3, wherein the confection mold trays are rotatable  
about a center axis.

5. The children's toy of claim 2, wherein the confection mold trays are  
configured to be interchangeably stacked.

6. The children's toy of claim 2, wherein the confection mold trays are vertically  
20 removable from the base platform.

7. The children's toy of claim 2, wherein the confection mold trays include a mold design cavity.

8. The children's toy of claim 7, wherein the confection mold design cavity  
5 includes an animal shape.

9. The children's toy of claim 8, wherein the animal shape is an earthworm

10. The children's toy of claim 8, wherein the animal shape is a bear.

11. The children's toy of claim 7, wherein the mold design cavity include a ring  
shape.

12. The children's toy of claim 1, wherein the base platform includes a mount  
15 configured to hold a dispenser for pouring a confection solution into the confection mold  
tray.

13. The children's toy of claim 12, wherein the dispenser includes a bottle.

14. The children's toy of claim 12, wherein the confection solution is configured to harden to a gel confection.

15. A kit for making confections of preselected designs, comprising:  
5 a base platform having an alignment member;  
a plurality of stackable confection mold trays including alignment structure configured to engage the alignment member of the base platform;  
a confection mixture configured to be dissolved in a solvent and then solidify into eatable confections; and  
10 instructions for making confections using the base platform, stackable confections molds, and the confections mixture.

16. The kit of claim 15, wherein the instructions include the steps of:  
making a confection solution from warm water and the confection mixture;  
15 filling the confection mold trays with the confection solution; and  
cooling the confection mold trays to solidify the confection solution into eatable confections.

17. The kit of claim 15, including a plurality of confection mixtures configured to  
20 be dissolved in a solvent and then solidify into eatable confections.

18. The kit of claim 15, wherein the base platform includes a mount configured to hold a dispenser for pouring a confection solution into the confection mold trays.

19. A children's toy for making confections of preselected designs, comprising:  
5 a base platform having a vertical alignment member located concentric with a central axis;

a plurality of stackable rotatable confection mold trays including alignment apertures configured to engage the vertical alignment member of the base platform as the trays are stacked, and wherein the trays are configured to rotate around the central axis; and

10 a confection mixture configured to dissolve in warm water and solidify into eatable confections as the dissolved mixture cools.
